COURSE DESCRIPTION
Why study the archaeology of Florida? If you have ever wondered what life was like hundreds or thousands of years ago in the places we call home, this is your opportunity to find out. Most of Florida’s past is unwritten, and knowable only through archaeological evidence. Luckily, there is no shortage of archaeological sites in Florida and many sites have been the focus of groundbreaking research. Many great discoveries have been made in the state, including well-preserved Paleoindian sites and organic-laden wet sites, early and grandiose traditions of mound building, evidence of extra-local social connections, and distinctive homegrown ritual practices. There is still much to learn from Florida’s past, but unfortunately the rate of research cannot keep pace with the speed of site destruction through urban development, looting, and the impacts of nature such as sea level rise.

This course reviews our current state of knowledge about Florida’s aboriginal past and follows significant thematic trends in recent research. The course is organized both temporally and geographically: we begin with the first inhabitants of Florida, then trace the development of distinctive native cultural traditions in various areas of the state. Throughout the course we will investigate interrelated themes of anthropological importance: monumentality and place making, people and the environment, sociopolitical complexity, social interaction and exchange, and the materiality of ritual.

STUDENT GOALS
1. Develop an appreciation for the diversity and importance of archaeological resources in Florida.
2. Gain familiarity with what is currently known about the pre-Columbian archaeology of Florida.
3. Understand the major trends that characterize native cultures in Florida in time and space.
4. Learn to evaluate scholarly work based on the merits of field, laboratory, and reporting methods.
5. Improve research and writing skills.

REQUIRED TEXTS
Milanich, Jerald T.  

RECOMMENDED TEXTS
Wallis, Neill J., and Asa R. Randall (editors)
Additional required readings will be posted on e-learning as listed in course schedule. Reading selections may be revised and updated as needed.

**COURSE FORMAT AND PROTOCOL**
The course will be comprised of lectures, discussions, and demonstrations. Students are responsible for all material covered in class, including material not appearing in the readings. Students are encouraged to ask questions during the lectures, both to clarify what was discussed and to raise related issues. However, talking amongst yourselves is disruptive, and students who persist in bothering others will be asked to leave. **TURN OFF CELL PHONES.** No portable electronic devices should be turned on or accessed (visible) during class with the exception of those used for taking notes.

**PERFORMANCE AND EVALUATION**
The final grade is composed of class participation, two exams, and a research paper. *In addition, graduate students are required to lead one discussion and make an in-class presentation of their semester projects.*

**Attendance and Participation:** Because much of the material is presented only in lectures and in-class demonstrations, missing class will prove detrimental to your understanding of the course material and ultimately to your final grade. Students are also expected to participate in class by asking and answering questions and participating in discussions. *Each graduate student must lead one class discussion on a topic of their choosing.* “Recommended” readings are “required” for graduate students.

**Exams:** The exams will consist of combinations of matching, multiple choice, and true-false questions along with fill-in-the-blanks and short-answer essays. A missed exam can be made up ONLY with a valid excuse if the student notifies the professor prior to the exam with appropriate documentation.

**Research paper/presentation:** Each student must write a 5-6 page research paper that details a topic in Florida archaeology (e.g., a particular site, an archaeological culture, or thematic synthesis). Final papers must be 12-point Times New Roman font, 1-inch margins, with a cover page and references page in addition to the minimum six pages of text. Papers must have a minimum of four scholarly sources *in addition to required readings from class.* Recommended readings from the syllabus are acceptable for fulfilling this requirement. Ask librarians or me for help in searching out other good sources. In addition to books, some good scholarly journals available through the UF library include *The Florida Anthropologist, Southeastern Archaeology,* and *American Antiquity.*

A one-page summary (100 word minimum) and list of at least three references (not including required course materials) must be turned in by **March 7.** I encourage you to
discuss your topic and available sources with me during office hours as you develop your research paper.

*Graduate students must write a 12-15 page paper with all the expectations of a publishable-quality manuscript. Please discuss proposed topic with me.*

**Grading:** Grades will be assigned on the following basis:

- Exam 1: 25%
- Exam 2: 25%
- Topic Summary and References: 10%
- Final Paper: 30%
- Participation: 10%

*NOTE: For graduate students, the in-class presentation will count as 10% of the final grade in lieu of the topic summary and references. Leading one class discussion counts as participation.*

Grading Scale (percentage points):

- A (94-100) A- (90-93) B+ (87-89) B (84-86) B- (80-83)
- C+ (77-79) C (74-76) C- (70-73) D+ (65-69) D (60-64) F (59 & BELOW)

**ACCEPTANCE OF COURSE REQUIREMENTS**

By remaining registered in this course, you agree to accept the course requirements and expectations as stated in this syllabus. These are in addition to other general University requirements and codes of conduct as stated in official documents. The following information is included to conform with University Policy: 1) Students seeking modification of due dates for assignments and exams for religious reasons (e.g., holiday observance) should feel free to contact the Professor and request this modification. 2) Students seeking any classroom accommodation to facilitate their education must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student, who must then provide this documentation to the Professor when requesting accommodation. 3) The University reminds every student of the pledge of Academic Honesty: “on any work submitted for credit the student has neither received nor given unauthorized aid.” This refers to cheating and plagiarism, which will not be tolerated in this class. Students caught cheating will be referred to the University administration for disciplinary action, the consequences of which can include failure of this course, and possible expulsion from the University. Students should consult the Student Guide at [www.dso.ufl.edu/stg/](http://www.dso.ufl.edu/stg/) for information.
