Course Description:
This course takes a look at the peoples of Brazil by exploring the history, culture, and contemporary issues facing Latin America’s most populous nation. Brazil is often characterized as a land of contrasts—between rich and poor; urban and rural; black and white, sacred and profane—a depiction that, though partly accurate, is insufficient. To speak of a country as massive as Brazil in terms of simple dichotomies is to ignore the inherent diversity that exists between, and outside of, these binary categories. In this course, we will cover the institutions, ideologies, and groups that coexist in seemingly contradictory fashion, paying close attention to the tensions generated by these contrasts. The course will conclude with coverage of recent developments in Brazilian society arising from its recent “boom.”

The course begins with a brief historical overview. The remainder of the course examines the enduring legacies of this history on contemporary Brazil through themes across four areas:

- Imaginary: covering popular culture and Brazilian ideologies
- Private: covering family structure, kinship, and social life and customs
- Public: covering religion and religiosity as well as government and political life
- Globalization: contextualizing Brazil’s achievements within global structures and exploring the tensions arising from its prominence

Throughout the semester, we will attend to race, class, and gender as inequalities that are important dimensions for understanding social life and communities. Rather than cover these as separate from the rest of the course content, our study of these constructs will be embedded throughout the semester.

Course Format:
The course will consist of lectures and discussions. There will also be films with some films shown in class and others put on reserve. Finally, occasionally, we will have guest lecturers presenting on topics related to course material.

Course Objectives:

- To provide a broad introduction to Brazil, its people, and customs through an anthropological lens
- To discuss globalization grounded on one nation’s experience
- To explore and critique the role of ideologies and stereotypes about national subjects
- To further student competence in international and social studies
- To help students develop analytical writing and critical thinking skills

Additional FOR GRAD STUDENTS:
