Objectives, Expectations, and Grading

Anthropology is a holistic discipline. As such, anthropologists attempt to view humans, their activities, and their cultural and biological history in as broad a context as possible. Proseminar II is designed to introduce first-year Anthropology graduate students to the fields of Biological Anthropology and Archaeological Anthropology. Lectures will provide background information and thematic context for key issues in these fields. John Krigbaum will lead the first module in Biological Anthropology and James Davidson will lead the second module in Anthropological Archaeology. Readings from the primary literature, class discussion, and writing assignments will focus on the big questions and contemporary issues in these two subfields. Such topics tackled should resonate across subfields and student interests and are intended to provide students of varied experience in anthropology to critically assess the state of the field. “Hands on” review of the physical remains and material culture may also be presented in class over the course of the semester.

University Honesty Policy

All students must comply with the University of Florida's Student Honor Code (<https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/>):

We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment."

The Honor Code specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the Instructor or the TAs in this class.

Accommodation

Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodations. Students with disabilities should follow this procedure as early as possible in the semester.

Ideally, student accommodation should be communicated to the Instructor by the second week of class (i.e., by August 28, 2017). The Disability Resource Center is located in Reid Hall, Room 001. For more information, please refer to the following link: <http://www.dso.ufl.edu/drc/>.

Counseling and Wellness Center

Students experiencing personal problems that are interfering with their academic performance are encouraged to contact the Counseling and Wellness Center: <http://www.counseling.ufl.edu/cwc/Default.aspx>, tel. Online Course Evaluation

Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be notified of specific times when evaluations become available. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results/>.

Take Home Exams

For both the Biological Anthropology and the Archaeology section there will be a take-home written exam, which constitutes 25% of your grade for that section of the course. Finals are due by December 14th at 4:30pm and should be submitted online in Canvas.

Written Assignments

Writing assignments or critical essays will be assigned and due at the beginning of class the following week. These written assignments are intended to precede discussion of that week's readings. This will ensure reading of required materials, and provide a baseline for each student to actively engage in discussion. Written work should be double-spaced, 12-point font, 2-3 pages in length (1200 words maximum) and will be focused on a particular point, idea, and/or theme presented. Late papers will be docked five points and only accepted no later than the next class meeting, that week.

Attendance & Participation

Attendance and class participation is mandatory.

Team Discussion

Each week, teams of two or three students will lead class discussion. Each group will be expected to meet outside of class to organize readings and to prepare a list of questions/points of discussion. As this constitutes a substantial portion of the grade, each team member will be expected to participate and have an active voice. ALL students are expected to have read the materials prior to in class discussion.

Week 10 Material Culture

Writing assignment this week

(2 pages, double-spaced. Proper citation of work required):

Questions:

How we structure or make sense of material culture is terribly important, but is the Type/Variety system the best means of imposing order on artifacts?

Are types real? How do Kreiger, Ford, Gifford, and the views expressed in the O'Brien, Lyman, and Schiffer text agree or disagree in regards to their views on artifact typologies? Should symbols be considered in artifact typologies?

WEEK 11 Time

Writing assignment this week

(2 pages, double-spaced. Proper citation of work required):

Clearly Archaeology is all about time, but whose time? Were/Are the concepts of time (and implied chronologies) different among the culture historians, processualists, and post processualists? What distinctions can be drawn from diachronic versus synchronic views of time?

How can we reconcile chronometric dating techniques with Richard Bradley's view of ritual time, and is there a false sense of security in chronometric dating that may suggest a precision that actually could be illusory?

WEEK 12 **Space and Place**

Writing assignment this week

(2 pages, double-spaced. Proper citation of work required):

This week we move from issues of artifacts and resulting typologies, which directly determine site and regional chronologies, to analyses that apply these chronologies -- of how and where people lived in the past.

How do the authors this week grapple with such issues as: determining how long sites were occupied (given the still course grained chronologies we employ); deal with issues of assessing site contemporaneity in regional settlement patterns; and employing ethnographic data and modeling to infer past behavior in regard to site features, population totals in rooms, sites, and regions? Are environmental factors of overarching importance in detecting and understanding settlement patterns, or is this too mechanical and deterministic a view?

Week 13 Subsistence (diet, economies)

Writing assignment this week

(2 pages, double-spaced. Proper citation of work required).

Subsistence is a key concept in archaeology, and directly influences settlement patterns and other issues of land use. What are the kinds of inferences that can be made regarding past subsistence strategies and diet, and can/should different methodologies (e.g., pollen analysis, faunal remains) be combined? Is food always just food, or is it something more? How can subsistence data be used to extract information beyond simple nutrition (e.g., chronology, status, culture, ethnicity)?
