ANG 6122C ARCHAEOLOGICAL CERAMICS

Instructor: Dr. Neill J. Wallis Office: 130 Dickinson Hall Phone: (352) 273-1920 email: <u>nwallis@flmnh.ufl.edu</u> Office Hours: Thursday 9:00 to 12:00 or by appointment Fall 2015 Section 1B73 Thursday 1:55-4:55 PM (Periods 7-9) Turlington Hall, Room B357

COURSE DESCRIPTION

Ceramics are one of the most common and durable artifacts on many archaeological sites throughout the world and they are important material for understanding past societies and cultures. The analysis of ceramics often forms a cornerstone of archaeological research programs and is the basis for investigations of a wide range of topics such as diet, cuisine, chronology, technological change, social learning, social boundaries, kinship, trade and exchange, migration, and demography, to name a few.

Archaeological Ceramics is a graduate-level seminar in the analysis and interpretation of pottery. In this sense the course title is a misnomer—we will consider low-fired, unglazed, and unvitrified pottery nearly exclusively. We will review a wide variety of analytical approaches to pottery, but the emphasis is on technological and functional (i.e. "technofunctional") approaches. The course is organized around a "life cycle" perspective that begins with the selection of clay and temper and follows the manufacture, use, discard, and recycling trajectories of alternative vessel technologies. We will focus on topics such as the mechanical performance of fabrics (pastes), design specifications, vessel forms, use alteration, and assemblage formation processes. Ethnoarchaeological and experimental research provide the criteria for understanding the decisions and behaviors linked to pottery. We will also review some of the analytical techniques used in paste analysis and the study of pottery provenance.

COURSE OBJECTIVES AND STUDENT GOALS

The overall goal of the course is to familiarize you with pottery analysis so that you can conduct independent research in the technofunctional variation of archaeological ceramics. Accordingly, you are required to either have access to an assemblage of potsherds for analysis (ideally from a context that is relevant to your research interests), or to review a body of literature outside of the class assignments and concerning technofunctional variation in pottery. Analysis will take a considerable amount of time, so you are strongly encouraged to begin working on an assemblage early in the semester. In this term project, we will employ a vessel unit of analysis and gather data on variables such as temper, wall thickness, vessel profile, orifice diameter, use alteration, and breakage patterns. The actual data you collect will be determined by the question(s) you pose. Our readings and class discussions will provide inspiration for the sorts of questions you might address and will also form the basis for inferences that bridge the gap between your data and the practices that created your assemblage. Your product should be a publication-quality paper, which means that you should present new

data from your analysis of a ceramic assemblage or offer a novel view of an archaeological problem based on your synthesis of existing literature.

REQUIRED TEXTS

Albero, Daniel (2014). Materiality, Techniques and Society in Pottery Production The Technological Study of Archaeological Ceramics through Paste Analysis. De Gruyter Open Ltd, Warsaw/Berlin. (open source).

Rice, Prudence M. (1987) Pottery Analysis: A Sourcebook, First Edition. University of Chicago Press, Chicago.

Recommended: Skibo, James M. (2013) Understanding Pottery Function. Springer, New York.

Additional readings as specified below. All are available on e-Learning within "Resources": <u>https://lss.at.ufl.edu/</u>

FORMAT AND GRADING

We meet every Thursday from 1:55-4:55 pm. The format of the course consists of a mixture of lecture, laboratory demonstrations, discussion, and an occasional film. You are required to be prepared to discuss all readings prior to each class meeting. Your grade for the course will be based on your performance on three lab quizzes (30 percent), a 20 page paper (60 percent), and class participation, including a 15-minute presentation to the class on your research project (10 percent).

ACCEPTANCE OF COURSE REQUIREMENTS

By remaining registered in this course, you agree to accept the course requirements and expectations as stated in this syllabus. These are in addition to other general University requirements and codes of conduct as stated in official documents. The following information is included to conform with University Policy: 1) Students seeking modification of due dates for assignments and exams for religious reasons (e.g., holiday observance) should feel free to contact the Professor and request this modification. 2) Students seeking any classroom accommodation to facilitate their education must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student, who must then provide this documentation to the Professor when requesting accommodation. 3) The University reminds every student of the implied pledge of Academic Honesty: on any work submitted for credit the student has neither received nor given unauthorized aid. This refers to cheating and plagiarism. Students should consult the Student Guide at www.dso.ufl.edu/stg/ for information.

SCHEDULE

August 27. Prospectus

Lab 1: What can we learn from pottery?

September 3. Pottery in Prehistory <u>Readings</u> Rice (1987) Chapter 1

Brown, James A. 1989 The Beginnings of Pottery as an Economic Process. In *What's New? A Closer Look at the Process of Innovation*, edited by S. E. van der Leeuw, pp. 203-224. Unwin Hyman, London.

Garraty, Christopher P. 2011 The Origins of Pottery as a Practical Domestic Technology: Evidence from the Middle Queen Creek Area, Arizona. *Journal of Anthropological Archaeology* 30:220-234.

Rice, Prudence M. 1996a Recent Ceramic Analysis: 1. Function, Style, and Origins. *Journal of Archaeological Research* 4:133-163.

1999 On the Origins of Pottery. Journal of Archaeological Method and Theory 6:1-54.

September 10. Pots to Sherds to Pots

<u>Readings</u> Albero (2014) chapters 14

Rice (1987) Chapter 9

Arnold, Dean E. 2011 Ceramic Theory and Cultural Process After 25 Years. *Ethnoarchaeology* 3:63-98.

Braun, David P. 1983 Pots as Tools. In *Archaeological Hammers and Theories*, edited by J. A. Moore and A. S. Keene, pp. 108-134. Academic Press, New York.

Crown, Patricia L. 2007 Life Histories of Pots and Potters: Situating the Individual in Archaeology. *American Antiquity* 72:677-690.

Stark, Miriam 2003 Current Issues in Ceramic Ethnoarchaeology. *Journal of Archaeological Research* 11(3):193-242.

September 17. Life Cycle Perspective Lab 2: Quantifying Assemblages

<u>Readings</u> Arthur, John W. 2009 Understanding Household Population through Ceramic Assemblage Formation: Ceramic Ethnoarchaeology among the Gamo of Southwestern Ethiopia. *American Antiquity* 74:31-48.
Beck, Margaret
2006 Midden Ceramic Assemblage Formation: A Case Study from Kalinga, Philippines. *American Antiquity* 71:27-51.

DeBoer, Warren R. 1974 Ceramic Longevity and Archaeological Interpretation: An Example from the Upper Ucayali Peru. *American Antiquity* 39:335-343.

DeBoer, Warren R., and Donald Lathrap

1979 The Making and Breaking of Shipibo-Conibo Ceramics. In *Ethnoarchaeology: Implications of Ethnography for Archaeology*, edited by C. Kramer, pp. 102-138. Columbia University Press, New York.

Mills, Barbara J. 1989 Integrating Functional Analyses of Vessels and Sherds through Models of Ceramic Assemblage Formation. *World Archaeology* 21(1):133-147.

Sullivan, Alan P. 2008 Ethnoarchaeological and Archaeological Perspectives on Ceramic Vessels and Annual Accumulation Rates of Sherds. *American Antiquity* 73:121-135.

September 24. Clay Selection and Preparation

*QUIZ 1

<u>Readings</u> Albero (2014) Chapters 6 and 7

Rice (1987) Chapters 2 and 3; Chapter 13: 375-382; Chapter 14: 406-413

Fowles, Severin W., Leah Minc, Samuel Duwe, and David V. Hill 2007 Clay, Conflict, and Village Aggregation: Compositional Analyses of Pre-Classic Pottery from Taos, New Mexico. *American Antiquity* 72:125-152.

Gosselain, Olivier P.

1994 Skimming Through Potter's Agendas: An Ethnoarchaeological Study of Clay Selection Strategies in Cameroon. In *Society, Culture, and Technology in Africa*, edited by S. Terry Childs, pp. 99-107. MASCA Research Papers in Science and Archaeology, Supplement to Volume 11. University of Pennsylvania Museum of Archaeology and Anthropology, Philadelphia.

Stark, Miriam T., Ronald L. Bishop., and Elizabeth Miksa 2000 Ceramic Technology and Social Boundaries: Cultural Practices in Kalinga Clay Selection and Use. *Journal of Archaeological Method and Theory* 7:295.331.

October 1. Temper Selection and Forming Techniques

Lab 3: Identifying Aplastics

<u>Readings</u> Albero (2014) chapters 8 and 9, 13

Rice (1987) chapter 5

Arnold, Dean E. 1985 *Ceramic Theory and Cultural Process*. Cambridge University Press, Cambridge. (Chap. 8 only)

Bronitsky, Gordon, and R. Hamer 1986 Experiments in Ceramic Technology: The Effects of Various Tempering Materials on Impact and Thermal-Shock Resistance. *American Antiquity* 51:89-101.

Rye, O. S. 1976 Keeping Your Temper Under Control. *Archaeology and Physical Anthropology in Oceania* 11(2):106-137.

Schiffer, Michael B., and James M. Skibo 1987 Theory and Experiment in the Study of Technological Change. *Current Anthropology* 28:595-622.

Skibo, James M., Michael B. Schiffer, and Kenneth C. Reid 1989 Organic-Tempered Pottery: An Experimental Study. *American Antiquity* 54:122-146.

October 8. Finishing and Firing Techniques *OUIZ 2

Lab 4: Surface Treatments

<u>Readings</u> Albero (2014) chapters 10, 11, and 12

Rice (1987) chapters 4, 14.3

Gosselain, Olivier P. 1992 Bonfire of the Enquiries. Pottery Firing Temperatures in Archaeology: What For? *Journal of Archaeological Science* 19(3):243-259.
