COURSE DESCRIPTION

The course focuses on ethnography as a form of representation of cultures by analyzing and questioning the construction of cultures through old and new media such as film, video, photography, and computer technology. Students are introduced to the *history of ethnographic film* and *contemporary changes* that have widened the possibilities of Visual Anthropology (VA) as a recognized sub-field while a comparison of several visual ethnographers provides a good overview of the variety of practices involved in the field. *Critical theory, methods, and ethical concerns* are important to understanding the development of VA and as such these issues will be raised. *Voices of indigenous populations* have historically been problematic in all anthropology; therefore, attention will be given to issues of *cross-cultural representation* and *colonial and post-colonial representations* as well as *feminist approaches to ethnography*. Finally, the *culture of social relations between media artists and community*, and the *processes of production* will be discussed as students tackle their assigned projects.

The course takes a *heuristic* approach to learning. In addition to reading and writing exercises (this is a 6,000 Gordon Rule course, the class has a practice feature in its content. Think of it as “on the job training.” Very few anthropologists go into the field without a camera. *How to make use of the technology beyond posed or out of context shots of members of cultural or social groups is an important portion of the class.* Through “trial and error,” students explore with the instructor the technical problems they encounter and discover best practices for translating human behavior across cultural and social boundaries. Visual Anthropology has the unique ability to produce ethnographic data for mass audiences. Therefore, understanding the technical and methodological approaches to producing ethnographic images for public consumption is an important skill to develop. Students are encouraged to use office hours. However, personal appointments beyond office hours must be requested through email.

This course is only an introduction that focuses on incorporating anthropological understandings into photography, video, and the World Wide Web. While students will become familiar with ethnographic and other documentary approaches in multi-media, and will carry out projects with digital media, the course **will not offer in-depth training in the mechanics of photography, lighting, videography, or editing.** However, students will be exposed to rudimentary uses of digital editing software for their projects and have access to training modules to assist them with understanding the editing software.

Objectives:

On completion of the course, students should be able to: 1) demonstrate a solid understanding of the history of ethnographic film, 2) explain a variety of theoretical approaches, 3) comprehend and compare the process of constructing media, 4) critically analyze the forms of interaction and self-reflexivity involved in producing visual ethnographic products, and 5) create a visual project that captures a sociocultural phenomenon.

Equipment and Technology: There is no textbook for this class. Each student must own or have access to a digital still camera, digital video camera, a firewire external hard drive with a minimum of 250 GB storage, and a computer with a CD/DVD burner connected to the Internet. Library West provides 3-day loans for low-end HD digital cameras. DropBox, Box.Net, iCloud, or other means of project file storage for remote access is also needed for class. Email capable of sending and receiving large files (up to 10 mb) is necessary for communicating for the class. **PLEASE DISCUSS ANY EQUIPMENT PROBLEMS/NEEDS WITH THE INSTRUCTOR AT THE BEGINNING OF THE SEMESTER.**

Week 1 Introduction to Course

1/10 – Introductions to Class and Anthropology

Class discussions:

- 1) Introductions of class members.
- 2) What are the goals?
- 3) How to read, take notes, and watch films for the class.
- 4) Submitting papers. LN-FN_PaperName-P#.doc
- 5) How the class is conducted. How is the syllabus constructed.
- 6) How to approach the first Individual Project assignment Due on 9/5.

PLEASE USE THIS WEEK TO WORK PRODUCTIVELY ON YOUR FINAL PROJECT.

FINAL EXAM DAY IS SCHEDULED FOR DECEMBER 13TH 12:30 PM – 2:30. SINCE PRESENTATIONS OF YOUR PROJECTS ARE GENERALLY PUBLIC EVENTS, WE WILL ATTEMPT TO DETERMINE A MORE SUITABLE SCHEDULE FOR YOUR PROJECT PARTICIPANTS. SINCE THERE ARE NO ATTENDANCE EXCEPTIONS AND NO EARLY DEPARTURES THE DECISION MUST BE UNANIMOUS. EACH STUDENT IS REQUIRED TO EVALUATE ALL FINAL PROJECTS. IT IS PART OF YOUR FINAL GRADE.

Project descriptions:

1. Autobiography: Study your personal space and document in a written text the ways in which that

physical environment visually symbolizes who you are. Next photograph that environment and construct a photo essay exhibit or web page (with no more than 10 images) that represents that understanding. Remember the medium is to be primarily visual; therefore, the visual project should "show" rather than "tell." – DUE WEEK 6

2. Representing "The Other." Find an individual whose social or cultural practices are different than your own. With permission capture a day-in-the-life of that person. The visuals should reveal activities that say something about the social/cultural life of the individual as well as capture personality. This project may be presented in either photos or video (with no more than 10 images or 2 minutes of video). Each student is to write a two-page paper explaining at least one problem incurred in carrying out this project and suggest a solution. Framing is important to this exercise. Incorporate a variety of shots to add depth and understanding to your visuals. – DUE WEEK 7
3. Anthropology in Cyberspace. Choose one of the two exercises described below. 1) Critique an existing website designed to develop social or cultural consciousness. Include in your critique suggestions for improvement. You should be able to link to the site in class and then combine your critique with the links. Visual creativity is expected in your presentation. 2) Choose an

anthropological topic and design a web site for its content. The site does not have to be functional in terms of links, therefore, you can use PhotoShop or other graphics programs to design the site. The site should include no more than 10 pages. – DUE WEEK 8

4. **Group Exercise. Final Version of Consent Form and First Draft of IRB (IRB02)**
<http://irb.ufl.edu/> (*ALL EXERCISES FROM THIS POINT ARE GROUP ASSIGNMENTS.*) Construct a consent form suitable for use with your group project. Visit the following web site, view several IRB formats, and construct first draft of IRB form, which will be submitted to the research committee for approval. <http://irb.ufl.edu/> Read the opening page then follow the link for IRB-02: UF Campus/Non-Medical. You will find links for copies of the UFIRB forms and sample Informed Consent documents. Your consent form is similar to the letter format although it is not a letter. – DUE WEEK 8
5. **Cultural Preservation.** Find a cultural practice or social phenomenon you believe will soon disappear and document it as an example of the value of “salvage” ethnography. Try to reveal “why” the practice is disappearing. Be certain to capture the custom in a way that others may be able to learn it in the future when no former practitioners exist. This project should be presented in the most appropriate format for the activity. (i.e., photos, video, PowerPoint) – DUE WEEK 10
6. **Interviews.** Conduct three interviews that will be used in your final project, either as background research or as footage. Be ready to show clips of the video and discuss what worked and did not work with the interviews in class. – DUE WEEK 11
7. **Autobiographical/Indigenous Ethnography.** Ask a person in a profession outside of the university setting to take 10 photographs that reveal what it means to be a person involved in such an occupation. Analyze the pictures and share the group’s understanding with that individual. Be prepared to share what you have learned from the exercise in class. – DUE WEEK 12
8. **Interaction.** Anthropologists focus on social and cultural behavior. As part of your final project find an interaction that reveals cultural worldviews or ideologies within the area you are investigating for your final project and capture an exchange that reflects these interactions. The project should be no longer than three minutes or fifteen images. – DUE WEEK 13

Messages through Movement. Anthropologists focus on social and cultural behavior. Find an activity that reveals cultural worldviews or ideologies and capture the actions that reflect either or both. This is a video exercise. The project should be no longer than two minutes. – DUE WEEK 13
9. **Storyboard.** Create a series of diagrams to depict the composition of your final video or website project. Each diagram should consist of: a sketch of the video or webpage image; a brief description of the visuals; notes for the camera operator; the details of the desired audio that will accompany the visual; and an estimate of how long the segment will be. The storyboard cards should then be placed in order to provide a foundation for capturing the proper footage/photographs and for making the correct editing/web-design decisions. – DUE WEEK 14
10. **Final Project. Visuals as Critiques of Society.** The final project can be a still, video, or web-based presentation. Choose a social issue of which visuals will be able to advance anthropological theory and/or critique a social phenomenon as well as contribute to our understanding of what it means to be human. Video projects should be designed to be no longer than 12 minutes long. If the final project is a web project, it should have between 10-20 pages.

Each group member will write a 10 to 12-page essay that describes the anthropological concept, or issue that is the focus of the group project, the research methods incorporated, the working conditions of your group and strategies used to complete the project, a conceptual guide for viewing the project, and finally a retrospective on visual anthropology. The final project will be presented in class at the end of the semester as well as a public showing. Groups will have a total of 20 minutes to set up and present their project. This time limit includes a 5-minute Q & A section. – DUE WEEK 16

Requirements and Evaluation

1) **Class attendance and Lab participation** is 100% mandatory (**10%**). Each unexcused absence will count as 3 missed class days. 2) **Weekly Visual Anthropology Blog entries** to each week's reading and website assignment (**15%**). Entries are due by 5 pm on the Wednesday of the assigned week. The URL for the course blog is: Entries should be critical responses to a specific issue you find important and should be between 250-400 words. 3) Students are required to keep **Film/Video Journal** (**10%**) that will be turned in at the end of the semester. All other written work must be emailed by 8 AM on due date to: thomas-houston@fmpp-inc.org. 4) **Visual technique exercises** to be presented in class four individual exercises (**5%**) and five group exercises (**10%**). Treat all visual technique exercises as formal presentations. All visual projects must be turned in on CD or DVD at the end of the semester. Each student and group will create a Blog Site for communicating to the class and their group. This Blog Site can serve as your Reading and Film Journal, if designed properly. Each group is expected to meet personally at least once a week either in person or through Skype. 5) **Group final project, final presentation, and final evaluation** (**25%**). This project consists of the submission of a complete IRB form and Consent Form (and any support materials) to the university's board, an in-class presentation of final project, and evaluation of all final projects based on sound anthropological and technological knowledge. The final version of the Consent Form and Draft of IRB (IRB02) <http://irb.ufl.edu> must be in no later than Oct.10, 2011. A copy of the IRB materials must also be emailed to the instructor on that day. 6) **One major critical paper** about the production of your group project (**25%**).

CLASSROOM RULES & DECORUM AND OTHER RELATED POLICIES

One missed 3-hour class is equal to 3 missed 50-minute classes. Plagiarism will not be tolerated. No emailing, texting, cell phone calls, or Internet games in the classroom. Absence and tardiness due to medical reasons require appropriate medical excuses. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation.
