- Recognize primate taxa and the associated anatomy, behaviors, and societal differences between them.
- Apply methods used to collect data on primate ecology and behavior.
- Examine cognition, culture, and communication in primates using the foundational knowledge of ecology and behavior.

Course format: This is an asynchronous online course with prerecorded lectures each week and assignments with due dates. Students should keep up with the material in a timely manner and meet expected due dates. **IMPORTANT: The use of Canvas (eLearning) will be essential to student success in the course.** All assignments are to be submitted through Canvas. How to be Successful in an Online Course

- Adjust [Canvas Notification Preferences](#) to enable Canvas to directly send you an email.
- Keep up with the lecture videos and take notes.
- Keep track of module assignments and quiz due dates. Many assignments need preparation time and cannot be done on the day it is due.
 - Some activities require outside class work, such as library research which could take a few days.
- Communicate with your instructor and TA about course questions, grading, and if you are falling behind.
 - Reach out as early as possible if you will be late in turning in assignments, sick, or have other extenuating circumstances that will affect your participation in the course.
 - We are willing to work with students when they communicate well about these issues.
- It is important to recognize that the online classroom is in fact a classroom, and certain behaviors are expected when you communicate with both your peers and your instructors. Guidelines for online behavior and interaction are known as netiquette. See Canvas for more details.
- Keep an open mind, be respectful, be considerate, and learn! You will enjoy this class!

Grading breakdown

30% Quizzes – 4 x 25pts = 100pts

15% Final Exam – 50pts

30% Perusall readings and discussions – 7 x 10pts = 70pts

25% Methods assignments – 2 x 20pts = 40pts

Extra Credit Opportunities:

EC Zoom sessions – up to 5pts

Other activities will be posted

NOTE - All writing assignments should be 12pt font, 1" margins, and submitted in Microsoft format.

Quizzes: At the conclusion of each section topic there will be a quiz covering the material learned. Quizzes will be a combination of multiple choice, matching, true/false questions, and short answer.

Final exam: The final exam will be cumulative - all material from the entirety of the course is examinable. The final exam will use a combination of question types.

Perusall readings and discussions: The use of *Perusall* will be used for peer reviewed articles. Follow the instructions to annotate, comment, and discuss the articles using the program. There will be 7 articles for grading.

Methods assignments: students will gain practice in collecting behavioral and ecological sampling during two exercises and write brief reports on the results. Provide a two-page, single-spaced report following the detailed instructions provided. References are not required.

EC Zoom session attendance: There will be scheduled zoom sessions over the term, each worth 1 attendance EC point. During these sessions, Dr. Bogart will review material, answer questions, and provide tips on assignments. Sessions will be recorded and made available on Canvas.

COURSE MODULE TOPICS:

1. Introducing the Primates!: Modules 1-5. Students will develop a working knowledge of the world's ~300 living species of primates and be able to understand what traits comprise members of the Order Primates. The goal is for identification of the major taxonomic categories of primates: e.g. strepsirrhines vs. haplorrhines and platyrhines vs. catarrhines.
2. Primate Ecology and Conservation: Modules 6-9. This section provides foundation in the environments primate live in and how they interact with their surroundings. Examining primates is not complete without understanding the conservation issues threatening their existence. The vast majority of primates are threatened with declining population numbers.
3. Primate Behavior: Modules 10-13. A closer look at what modern primatologists study most often – primate behavior, and the influence of environmental variables on primate behavior.
4. Primate Cognition and Communication: Modules 14-15. Introduces students to current research in primate cognition and communication and the various methods employed.
