

Introduction to African Archaeology

ANT3930
Dr. Katherine Grillo

Fall 2023
Mon 5:10-6:00 pm
Wed 5:10-7:05 pm

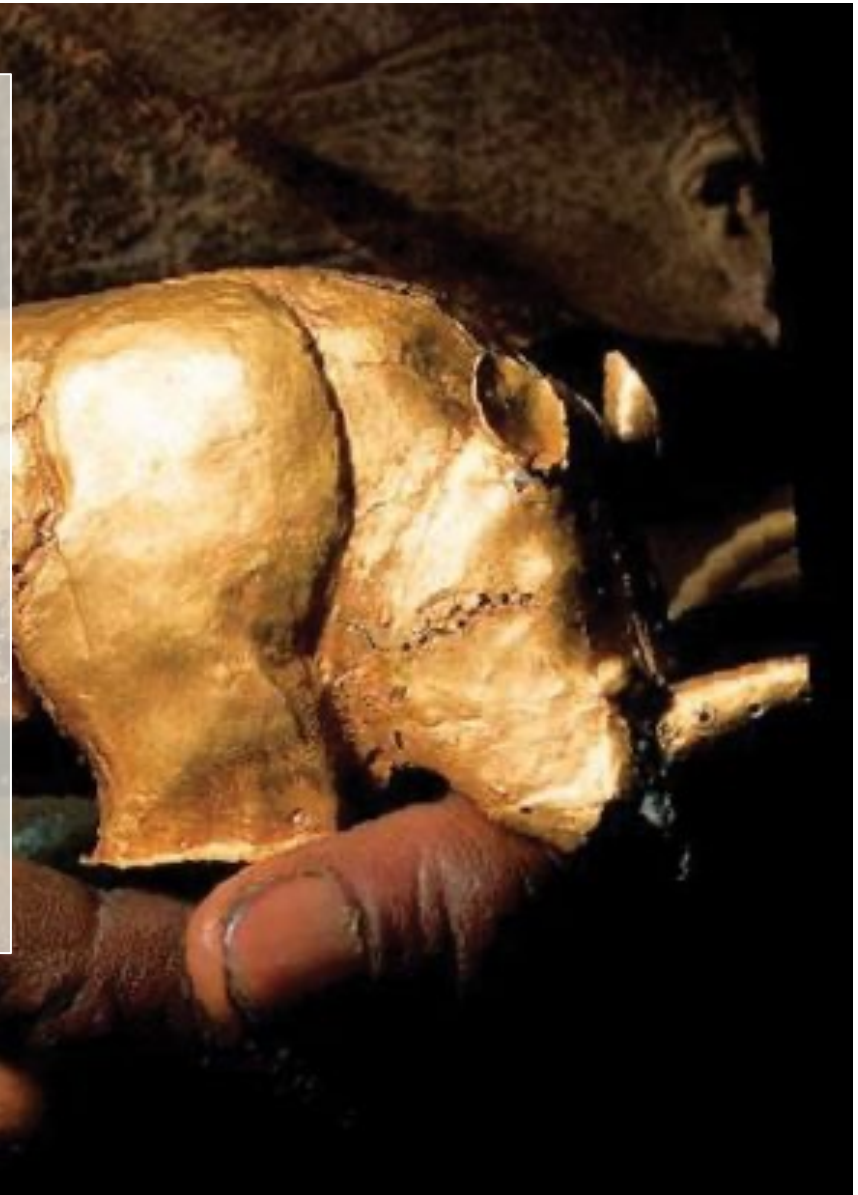

examine the rich archaeological history of African peoples and cultures, from millions of years ago to right now

topics will include:

- the origins of our species, *Homo sapiens*, across Africa
- the domestication of African plants and animals, the development of metallurgy, and the rise of complex urban societies
- the archaeology of Atlantic slavery and contemporary issues in cultural heritage

****students will receive priority consideration for summer fieldwork opportunities in eastern Africa****

no prerequisites, all are welcome
